

New Zealand Maritime Museum HUI TE ANANUI A TANGAROA

Jewels of the Sea

Discover how you can make a difference to the future of our oceans!

Did you know 80% of our oxygen comes from the oceans? The oceans cover 70% of the world's surface and regulates the earth's temperature and weather. We know very little about our oceans and their undiscovered diversity and taonga, yet, we are destroying its potential to sustain us into the future through pollution, overuse and ignorance.

Join us in this programme to discover why we need healthy oceans. Explore how to be innovative in how we can help through recycling everyday plastic bags into gifts of beauty.

THIS PROGRAMME CAN BE BROUGHT TO YOUR SCHOOL OR YOUR SCHOOL CAN COME TO US

Programme overview

During this 1 1/2 hour hands-on programme your students will learn about our oceans and the issues facing their future. Each student will make their own jewel of the sea out of plastic bags.

Should you choose to bring your students to visit our Museum they will enjoy a fully programmed timetable including:

- An educator-led workshop that will include jewellery making and an up-close discovery of the wildlife living around our pontoons
- A self-guided trail to discover the rest of the Museum's magnificent collection. Students will work in small groups led by their adult supervisors enabling your students to follow their own interests and learn at their own pace

Please talk to us when booking about additional learning experiences including:

- An experience on board a wind-powered/solar-powered waka hourua
